

Scalability & Future Plan

Date	30 September 2026
Team ID	SWTID-2026-2597
Project Name	Streamlining IT Procurement – Automating Standard Laptop Orders with Flow Designer
Maximum Marks	1 Mark

Scalability & Future Plan:

This document outlines how the current ServiceNow solution can be extended to support larger numbers of requests, additional device types, increased automation and future procurement requirements.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address
1	Currently focused on Standard Laptop requests.	Other device procurement needs require additional catalog items and flows.	Medium
2	Project is designed for a limited development/test environment.	Higher request volumes require performance and monitoring validation.	Medium
3	Some approval and notification rules are basic.	Complex organizational policies may require more conditions.	Medium

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Designed for normal employee requests.	Validate with higher concurrent requests and monitor performance.
2	Data Storage	Uses ServiceNow tables and records.	Apply data retention, indexing and reporting practices as volume grows.
3	Performance	Flow handles standard request processing.	Optimize Flow steps and monitor execution time for larger workloads.
4	Security	Uses ServiceNow roles and access controls.	Strengthen role-based access, approval rules and audit monitoring.

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
Phase 1	Add more laptop configurations and standardized request options.	Next release	Broader procurement coverage.
Phase 2	Add desktop, monitor and accessory catalog items.	Future sprint	Support multiple IT assets.
Phase 3	Enhanced approvals, notifications and dashboards.	Future sprint	Improved control and visibility.
Phase 4	Analytics and performance optimization.	Long term	Better reporting and scalability.
